

PUT YOUR FRESHNESS ON DISPLAY

Temperature is at the heart of every True product, and our selection of glass door cabinets are no exception.

A favourite of retailers for merchandising chilled beverages, it isn't uncommon to find Bottle Coolers on the market with holding temperature ranges as high as $+10^{\circ}$ C or even $+12^{\circ}$ C at the top of the scale. For customers seeking refreshment, these numbers simply don't quench it.

All glass door True products maintain the same strict 0.5°C to 3.3°C temperature range and fast pull-down times as our foodservice products, guaranteeing food-safe temperatures for packaged food merchandising and colder bottles, every time.

Our Natural Refrigerant initiative aligns perfectly with operators focused on responsible environmental practices. True "HC" products provide comparatively quicker temperature recovery and significantly reduce energy consumption.

ALL True products are covered, as standard, by an industry-leading 5 Years Parts & Labour Warranty. We provide premier customer service and after-sale support to our clients locally, for guaranteed peace of mind.

We are world leaders in commercial refrigeration built on a reputation that every True product must be able to maintain consistent, accurate and safe storage temperatures, even in the most demanding of foodservice environments.

ENERGY EFFICIENCY

Today, every serious operator has targets around sustainability, including energy management programmes to reduce wastage. By choosing the latest, most efficient equipment available, energy consumption can be considerably reduced.

Glass Door Uprights **T-Series**

- Split door options: half solid + half glass or two half glass
- Frosted glass options

- Cabinet exterior and interior colour options
- "Pass-thru/Rear-load" options

True's industry leading foodservice storage product, **T-Series**, also offers a number of specifications in glass door, for **the ultimate in product temperature** and cabinet durability, combined with effective product display.

What is True "Low-E" glass?

True glass door products feature **low emissivity**, double pane thermal insulated glass, which we manufacture ourselves in-house.

Emissivity is the process of **reflecting UV and infrared light**, effectively keeping heat from entering the refrigerator. Microscopically thin transparent coatings are combined with an argon gas insert, placed between the panes to provide a **better thermal break**, making our glass more energy efficient, while providing high product visibility.

Glass Door Undercounters TUC

- Option of "Low Profile" castor reduces overall height to 810 mm
- Adjustable, heavy duty PVC coated shelves
- Cabinet exterior and interior colour options
- Locks available with SPEC3 upgrade option

TUC's are True's all-purpose undercounter range, also featuring a number of glass door options, ideally suited to applications such as cafes and coffee shops.

Product	TUC-24G	TUC-27G	TUC-48G
Dimensions LxDxH	610 x 629 x 804	702 x 766 x 839	1229 x 766 x 839
Shelves	2	2	4

TUC-24's exclusively feature a front breathing design, paired with a fully commercial "forced air" refrigeration system within it's small footprint.

What is the SPEC3 option?

The SPEC3 product enhancement package is available on True undercounter, worktop and prep table products.

SPEC3 features a number of **build and aesthetic upgrades** over the standard product, including higher gauge construction materials for greater durability, lifetime guaranteed heavy duty metal door handles and Door/Drawer **locks on all models**.

Glass Door Merchandisers **GDM**

- Swing and Slide door options
- Cabinet exterior and interior colour options
- Stainless Steel and Aluminium finishes available
- Freezer model (GDM-23F)

- "Pass-thru/Rear-load" options
- Wide variety of sign panel and decal branding options available
- Castors available, for easy repositioning

GDM's are True's Glass Door Merchandisers, available in a wide range of sizes, with swing or slide doors, ready to be **customised with your branding**.

Swing Doors

True Visual Merchandiser TVM

Refrigeration system maintains cabinet temperatures **0.5°C to 3.3°C**, ideal for packed food merchandising and rapid cooling of beverages.

Illuminated sign panel, customisable with your graphics.

Swing doors are **self-closing** with 90° degree **stay open feature.**

LED interior lighting runs the door length, for bright and even illumination of your product display.

Loadbearing, adjustable cantilever shelving can be flat or angled.

True RCU technology

helps reduce the need for pm, increasing the operating efficiency of the cabinet and lifespan of the system.

Low-profile thin frame doors and no centre mullion, for increased product visibility.

Slim Line depth of 620mm, ideal for in-aisle retail applications.

"No stoop" lower shelf raises merchandised product level to maximise product visibility.

- Highly energy efficient compared to multideck options
- Cabinet exterior and interior colour options
- Wide variety of sign panel and decal branding options available
- Castors available, for easy repositioning

TVM's are True's Visual Merchandiser, so named due to its low-profile door frames which provide increased visibility of the product display. A highly energy efficient replacement for any open multideck refrigerator cabinet.

Dimensions LxDxH	915 x 534 x 1410	1197 x 620 x 2011	
Shelves	8	8	

Significant Energy Savings

Multidecks aka open-air merchandisers are a preferred cabinet option for many grab-and-go and QSR operators, but the lack of any solid barrier between the cooled interior and warmer exterior temperatures means they are much less energy efficient than an equivalent refrigerator with doors.

True's **TVM** is designed to bridge this gap, retaining a high level of product visibility whilst massively reducing the amount of energy consumed, providing significant cost savings to the operator.

*savings estimate calculated based on €0.31 cost per kWh
